

BP204T	Pathophysiology – Theory	75	3 Hrs
--------	--------------------------	----	-------

## **BP 204T.PATHOPHYSIOLOGY (THEORY)**

**45Hours**

**Scope:** Pathophysiology is the study of causes of diseases and reactions of the body to such disease producing causes. This course is designed to impart a thorough knowledge of the relevant aspects of pathology of various conditions with reference to its pharmacological applications, and understanding of basic pathophysiological mechanisms. Hence it will not only help to study the syllabus of pathology, but also to get baseline knowledge required to practice medicine safely, confidently, rationally and effectively.

**Objectives:** Upon completion of the subject student shall be able to –

1. Describe the etiology and pathogenesis of the selected disease states;
2. Name the signs and symptoms of the diseases; and
3. Mention the complications of the diseases.

### **Course content:**

#### **Unit I** **10Hours**

- **Basic principles of Cell injury and Adaptation:**

Introduction, definitions, Homeostasis, Components and Types of Feedback systems, Causes of cellular injury, Pathogenesis (Cell membrane damage, Mitochondrial damage, Ribosome damage, Nuclear damage), Morphology of cell injury – Adaptive changes (Atrophy, Hypertrophy, hyperplasia, Metaplasia, Dysplasia), Cell swelling, Intra cellular accumulation, Calcification, Enzyme leakage and Cell Death Acidosis & Alkalosis, Electrolyte imbalance

- **Basic mechanism involved in the process of inflammation and repair:**

Introduction, Clinical signs of inflammation, Different types of Inflammation, Mechanism of Inflammation – Alteration in vascular permeability and blood flow, migration of WBC's, Mediators of inflammation, Basic principles of wound healing in the skin, Pathophysiology of Atherosclerosis

#### **Unit II** **10Hours**

- **Cardiovascular System:**

Hypertension, congestive heart failure, ischemic heart disease (angina, myocardial infarction, atherosclerosis and arteriosclerosis)

- **Respiratory system:** Asthma, Chronic obstructive airways diseases.

- **Renal system:** Acute and chronic renal failure .

<b>Unit II</b>	<b>10Hours</b>
<ul style="list-style-type: none"> <li>• <b>Haematological Diseases:</b> Iron deficiency, megaloblastic anemia (Vit B12 and folic acid), sickle cell anemia, thalassemia, hereditary acquired anemia, hemophilia</li> <li>• <b>Endocrine system:</b> Diabetes, thyroid diseases, disorders of sex hormones</li> <li>• <b>Nervous system:</b> Epilepsy, Parkinson's disease, stroke, psychiatric disorders: depression, schizophrenia and Alzheimer's disease.</li> <li>• <b>Gastrointestinal system:</b> Peptic Ulcer</li> <li>• </li> </ul>	
<b>Unit IV</b>	<b>8 Hours</b>
<ul style="list-style-type: none"> <li>• Inflammatory bowel diseases, jaundice, hepatitis (A,B,C,D,E,F) alcoholic liver disease.</li> <li>• <b>Disease of bones and joints:</b> Rheumatoid arthritis, osteoporosis and gout</li> <li>• <b>Principles of cancer:</b> classification, etiology and pathogenesis of cancer</li> <li>• <b>Diseases of bones and joints:</b> Rheumatoid Arthritis, Osteoporosis, Gout</li> <li>• <b>Principles of Cancer:</b> Classification, etiology and pathogenesis of Cancer</li> </ul>	
<b>Unit V</b>	<b>7 Hours</b>
<ul style="list-style-type: none"> <li>• <b>Infectious diseases:</b> Meningitis, Typhoid, Leprosy, Tuberculosis</li> </ul> <p>Urinary tract infections</p> <ul style="list-style-type: none"> <li>• <b>Sexually transmitted diseases:</b> AIDS, Syphilis, Gonorrhea</li> </ul>
